EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Arthur Yuan on January 29, 2009.

The application has been amended as follows:

Cancel claims 33 and 35-48.

In claim 1, lines 1-3: replace the current terminology recited in lines 1-3 with the following:

-- A component audit and inventory management system comprising: --

In claim 1, line 14: the term "and" was deleted.

In claim 1, line 19: the terminology, "and software inventory data of the target device." was changed to:

--and software inventory data of the target device; and
an inventory agent comprising executable code for communicating with the receiver, detector, and transmitter. --

In claim 2: replace the terminology "the inventory-commence message with the identity" with the terminology: -- an inventory-commence message with an identity --

Allowable Subject Matter

2. Claims 1-5, 7, and 8 are allowed.
3. The following is an examiner's statement of reasons for allowance:

The prior art, Fleming (US 6,530,018), discloses a component audit and inventory management system including a receiver on a target device including means for receiving a message from a client computer over a data network, a detector on the target device including means for collecting hardware and software inventory data relating to hardware and software installed on a the target device, and a transmitter including means for transmitting from the target device to a host unit of the component audit and inventory management system an inventory data message including the inventory data associated with the target device.

The prior art fails to show a remote client computer sending a request to a host computer, the host computer sending an inventory-commence message to the client computer in response to the request, wherein the client computer initiates access to the host unit for accessing the inventory data of the target device, and a receiver on the target device for receiving an inventory-commence message from the client computer.

The limitations lacking in the prior art, in combination with the other limitations clearly claimed for patent, are novel and unobvious.

Conclusion

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to CHRISTOPHER R. BUCHANAN whose telephone number is (571)272-8134. The examiner can normally be reached on Mon.-Fri. 9:00am - 5:30pm.
